🔗 My Portfolio

SKILLS

Unreal Engine

Experienced in using Blend Space, Sequencer Editor, and Retargeting within Unreal Engine to adapt and refine character animations. Skilled at optimizing animation workflows and contributing both technically and creatively to projects.

Unity

Experienced in using Unity Animator Controller and Blend Trees to create basic animation state machines. Able to set up simple transitions, use parameters, and integrate character animations into gameplay systems.

Maya & Blender

As a Technical Animator, I specialize in rigging, animation, and automation tools, with expertise in creating custom rigs, control rigs, and polished animations for both gameplay and cinematics. Skilled in building rigs compatible with Unreal Engine 4/5 mannequin skeletons, retargeting, mocap cleanup, Python scripting, and developing automation tools.

Spine

Experienced in Spine for 2D rigging, animation and game-ready asset production. Skilled in mesh deformation, optimized animation workflows and Unity integration.

Python & MEL Scripting

Experienced in using Python to develop scripts and automation tools for both Unreal Engine and Maya workflows. Skilled in creating pipeline tools, optimizing repetitive tasks, and improving production efficiency through custom scripting.

GAME EXPERIENCE

Rise Online World 🔗, Released PC Game

In the development of *Rise Online World*, I was responsible for 3D animation, creating humanoid/quadruped/creature rigs for both ingame and cinematic use, cinematic animations, and automated retargeting systems.

September 2023 –
February 2026

V.O.L.T 🔗, Upcoming PC Game

In the development of *VOLT*, I was responsible for 3D animation, Unreal Engine 5 Animation Blueprint, creating blend spaces, retargeting, character and weapon rigging, multi-rig automation tools in Python/MEL.

June 2024 –
February 2026

Reflection: The Greed 🔗, Released PC Game

In the development of *Reflection: The Greed*, I was responsible for ingame & cinematic 3D animations, humanoid/creature rigs, retargeting automation, and video editing for cinematics and trailers.

December 2021 –
April 2023

Slime Spy 2: Ninja Assassin 🔗, Released Casual Mobile Game

In the development of *Slime Spy 2: Ninja Assassin*, I was responsible for creating the intro animation, character and prop rigging, gameplay animations, and building attachment rigs and sockets for gameplay systems.

December 2021 –
May 2022

Road Crashers 🔗, Released Hybrid Casual Mobile Game

In the development of *Road Crashers*, I was responsible for creating modular vehicle rigs.

December 2021 –
July 2022

WORK EXPERIENCE

Paxie Games, Game Animator

Working as a *Game Animator* at Paxie Games, focused on creating stylized animations, Unity integration and technical animation workflows for mobile games. Responsible for delivering responsive and satisfying animations while maintaining strong readability, timing, and game-feel.

June 2026 – Present
Istanbul, Turkey

Rokogame Studios, Technical Animator

Working as a *Technical Animator* on an *upcoming FPS hero shooter project and Rise Online World*, handling 3D character animation, complex character, weapon and skill rigging, and scripting in Autodesk Maya (Python & MEL) and Unreal Engine.

September 2023 –
February 2026
Istanbul, Turkey

Pi Games, 3D Animator

Working as a *3D Animator* at Pi Games, I was responsible for creating 3D character animations and making camera animations in Unreal Engine to enhance cinematics and gameplay.

June 2023 –
September 2023
Istanbul, Turkey

Zonex Entertainment Studios, Technical Animator

Working as a *Technical Animator* at Zonex Entertainment Studios, I was responsible for 3D Animation/Rigging/Modeling for *Reflection: The Greed*, Video Editing and social media management.

October 2021 –
May 2023
Istanbul, Turkey

Warner Bros Discovery Turkey, 3D Generalist

I was responsible for animation, environment design, modeling, lighting, and visual effects in Blender for a documentary project that was later cancelled.

February 2022 –
February 2023

EDUCATION

Topkapi University , 3D Design and Animation

Before I started university, I already knew the principles of Animation and I chose this department to meet new people from the industry. While me and a large team of 5 people were working, we created 2 computer games for our school in just 1 month per game.

September 2020 –
June 2022
Istanbul, Turkey

AWARDS

Toprak İçin Koş , School Project

The mobile game we developed contributed to Superior Mesenteric Artery (SMA) patient Toprak's recovery process and brought excitement to his life.

August 2021

Bir Fidan Bir Nefes , Social Responsibility Project

The social responsibility project we implemented to raise awareness about forest fires has been an important step towards educating the community and protecting nature.

August 2021
